Designing Inspiration

ENSEMBLE SERIES

**EB 3**

**Unleash headphone's full potential**

## Special Features

- Premium amplifier designed to deliver full sound to headphones
- Studio-quality IC with THAT 1646W16-U & 1512S14-U
- Classic SilverStone Ensemble exterior design
- Independent volume control knob
- Extra RCA bypass connection included for easy pairing with additional device

ENSEMBLE SERIES

# EB03

Unleash headphone's full potential

## Introduction

For audiophiles, getting the most out of their high-end headphones is more than just about getting the best source or music format. High-end headphones often have higher resistance so if the equipment connected to them are subpar, the sound quality will suffer. With the Ensemble EB03, SilverStone aims to provide the power and quality necessary to unleash the full potential of headphones.

EB03's excellent sound amplification is produced by its internal studio-quality IC (integrated circuit) with premium Op-amp, current buffer, and enhanced power delivery. For discerning users, it also has an extra bypass connection for use with an additional amplifier or receiver. Finished with classic aluminum design that defines SilverStone's longstanding tradition of excellent metal works, the EB03 is the perfect companion to high quality headphones. Besides using the EB03 on its own, users may also pair it with SilverStone's own similarly styled EB01-E DAC to create a great looking, and sounding computer audio system!

## Specifications

Model	SST-EB03B (black) SST-EB03S (silver)
Color	Black or silver
Material	Aluminum & steel chassis
Overall Dimension	152mm (W) x 82mm (H) x 176mm (D)
Dimension w/o knob & feet	152mm (W) x 55mm (H) x 156mm (D)
Input	RCA
Output	φ6.3mm stereo jack, RCA connector (bypass)
IC	THAT 1646W 16-U & 1512S14-U
Headphone resistance	16-600 ohm
